

STATE ROUTE 58

HINKLEY EXPRESSWAY PROJECT

California Department of Transportation

San Bernardino County, California

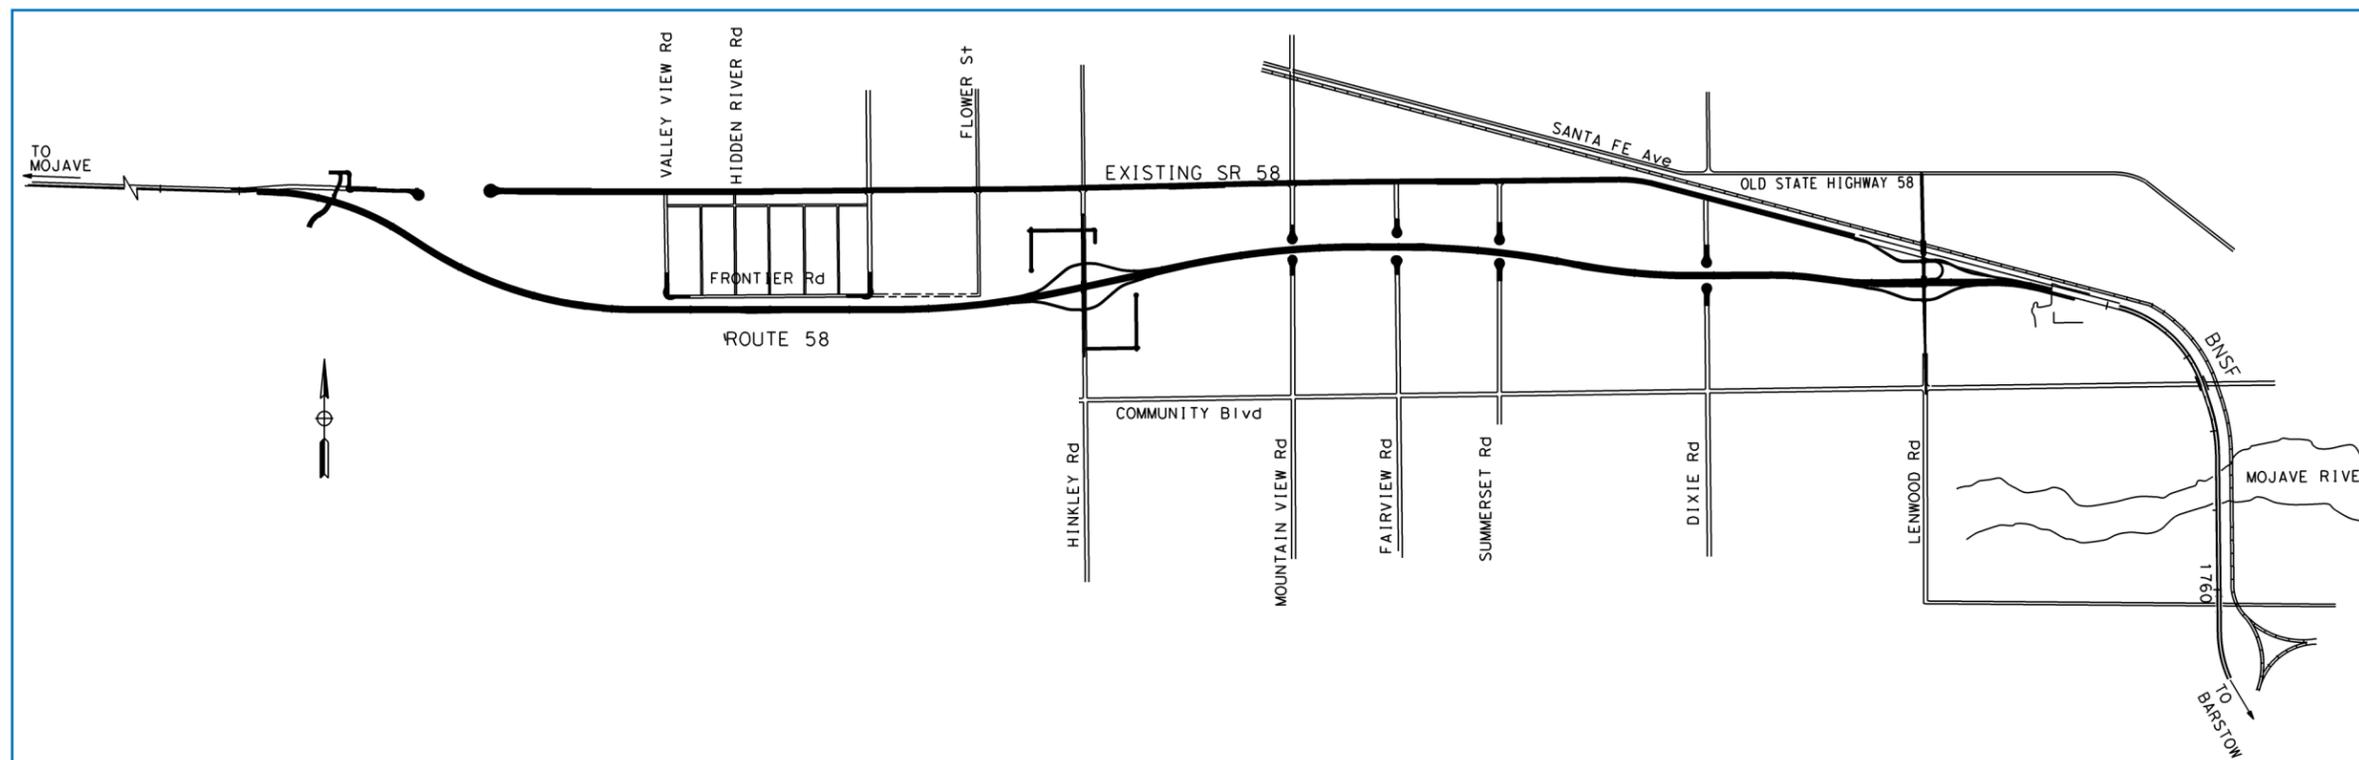

District 8 — SBD — SR58 — Post Mile 22.2 to 31.1

March 2016

Project Overview

The California Department of Transportation (Caltrans) project to widen a portion of State Route 58 from a two-lane conventional highway to a four-lane expressway, is now in the construction phase. The improvements to State Route 58 extend from approximately 2.8 miles west of Hidden River Road to approximately 0.7 miles east of Lenwood Road, in and around the unincorporated Community of Hinkley, in San Bernardino County. The expressway would include: 12-foot standard traveled way lanes; 10-foot standard shoulder widths; and a 78-foot-wide median.

Two interchanges will be constructed; one at Hinkley Road and the other at Lenwood Road. This realigned roadway would be constructed on a fill section (elevated sections of a roadway).

Batch Plant Location:
