Mr. Dave Chakraborty  
Director of Facilities  
CSU Channel Islands  
1 University Drive  
Camarillo, CA 93012

July 02, 2009

Dear Mr. Chakraborty:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Don Spagnolo  
Director Of Public Works  
City of Arroyo Grande  
P O Box 550  
Arroyo Grande, CA 93421

July 02, 2009

Dear Mr. Spagnolo:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Daniel Schiada  
Director Of Public Works  
City of Benicia  
250 East L Street  
Benicia, CA 94510

July 02, 2009

Dear Mr. Schiada:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Luke Serpa  
Assistant Public Utilities Director  
City of Clovis  
155 N. Sunnyside  
Clovis, CA 93611

July 02, 2009

Dear Mr. Serpa:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Tom Williams  
Interim City Engineer  
City of Colton  
160 South 10th Street  
Colton, CA 92324

July 02, 2009

Dear Mr. Williams:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Ms. Therese Ambrosi  
Director Of Public Works  
City of Half Moon Bay  
501 Main Street  
Half Moon Bay, CA 94019

July 02, 2009

Dear Ms. Ambrosi:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Tony Coe  
Engineering Services Manager  
City of Lafayette  
3675 Mt. Diablo Blvd, Suite 210  
Lafayette, CA 94549

July 02, 2009

Dear Mr. Coe:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Shailesh Patel  
Bureau of Engineering, SED, Div Engr.  
City of Los Angeles  
1149 S. Broadway, Ste 740, 7th Floor  
Los Angeles, CA 90015

July 02, 2009

Dear Mr. Patel:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Stephen Badum  
Director Of Public Works  
City of Newport Beach  
P O Box 1768  
Newport Beach, CA 92658-8915

July 02, 2009

Dear Mr. Badum:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Mario Moreno  
City Engineer  
City of Pleasant Hill  
100 Gregory Lane  
Pleasant Hill, CA 94523-3323

July 02, 2009

Dear Mr. Moreno:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

July 02, 2009

Mr. Baldomero Rodriguez  
Director Of Public Works  
City of Porterville  
291 North Main Street  
Porterville, CA 93257

Dear Mr. Rodriguez:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr.Nasser Abbaszadeh  
Dir. of Engineering & Building Services  
City of San Juan Capistrano  
32400 Paseo Adelanto  
San Juan Capistrano, CA 92675

July 02, 2009

Dear Mr.Abbaszadeh:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

69 Stony Circle  
Santa Rosa, CA 95401

Dear Mr. Moshier:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Steven Cresswel  
City Engineer  
City of Santee  
10601 Magnolia Avenue  
Santee, CA 92071-1266

July 02, 2009

Dear Mr. Cresswel:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. William G. Hughes  
Director Of Public Works  
City of Temecula  
P O Box 9033  
Temecula, CA 92589-9033

July 02, 2009

Dear Mr. Hughes:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Doug Stack  
Asst. Director Of Public Works  
City of Tustin  
300 Centennial Way  
Tustin, CA 92780

July 02, 2009

Dear Mr. Stack:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr.Dave Madragal  
Director Of Public Works  
City of Willits  
380 East Commercial Street  
Willits, CA 95490

July 02, 2009

Dear Mr.Madragal:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Ms.Carol Scanna  
Public Works Director  
City of Winters  
318 First Street  
Winters, CA 95694

July 02, 2009

Dear Ms.Scanna:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Mike Crump  
Director Of Public Works  
County of Butte  
7 County Center Drive  
Oroville, CA 95965-3397

July 02, 2009

Dear Mr. Crump:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Rob Houghton  
Director Of Public Works  
County of Calaveras  
891 Mountain Ranch Road  
San Andreas, CA 95249-9709

July 02, 2009

Dear Mr. Houghton:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

July 02, 2009

Dear Mr. Shepard:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Frank Fowler  
Dept of Public Works & Planning  
County of Fresno  
2220 Tulare Street, 6th Floor  
Fresno, CA 93721

July 02, 2009

Dear Mr. Fowler:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Charles Janiel  
Superintendent  
County of Fresno Parks & Grounds  
2220 Tulare St. 6th Floor  
Fresno, CA 93721

July 02, 2009

Dear Mr. Janiel:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

July 02, 2009

Mr. Thomas K. Mattson  
Director Of Public Works  
County of Humboldt  
1106 Second Street  
Eureka, CA 95501

Dear Mr. Mattson:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Brent Siemer  
Public Works Director  
County of Lake  
255 N. Forbes Street  
Lakeport, CA 95453

July 02, 2009

Dear Mr. Siemer:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Dana S. Hertfelder  
Director Of Public Works  
County of Mariposa  
4639 Ben Hur Road  
Mariposa, CA 95338

July 02, 2009

Dear Mr. Hertfelder:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr.Howard Dashiell  
Director Of Transportation  
County of Mendocino  
340 Lake Mendocino Drive  
Ukiah, CA 95482

July 02, 2009

Dear Mr.Dashiell:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

July 02, 2009

Mr. Paul A. Fillebrown  
Director Of Public Works  
County of Merced  
345 West Seventh Street  
Merced, CA 95340

Dear Mr. Fillebrown:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Yazdan T Emrani  
Director Of Public Works  
County of Monterey  
168 W. Alisal Street, 2nd floor  
Salinas, CA 93901

July 02, 2009

Dear Mr. Emrani:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Robert Peterson  
Director Of Public Works  
County of Napa  
1195 Third Street, Rm 201  
Napa, CA 94559

July 02, 2009

Dear Mr. Peterson:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Jerry Blinn  
Director Of Public Works  
County of Plumas  
1834 East Main Street  
Quincy, CA 95791

July 02, 2009

Dear Mr. Blinn:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. George A. Johnson  
Director Of Transportation  
County of Riverside  
P O Box 1090  
Riverside, CA 92502-1090

Dear Mr. Johnson:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Granville Bowman  
Director of Public Works  
County of San Bernardino  
825 East Third Street  
San Bernardino, CA 92415-0835

July 02, 2009

Dear Mr. Bowman:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. John L. Snyder  
Director Of Public Works  
County of San Diego  
5555 Overland Avenue, Suite 2156  
San Diego, CA 92123-1295

July 02, 2009

Dear Mr. Snyder:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. John J. Presleigh  
Director Of Public Works  
County of Santa Cruz  
701 Ocean Street, Rm 410  
Santa Cruz, CA 95060-4070

July 02, 2009

Dear Mr. Presleigh:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Patrick Minturn  
Director Of Public Works  
County of Shasta  
1855 Placer Street  
Redding, CA 96001

July 02, 2009

Dear Mr. Minturn:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Tim H. Beals  
Director Of Transportation  
County of Sierra  
101 Courthouse Square  
Downieville, CA 95936

July 02, 2009

Dear Mr. Beals:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Brian McDermitt  
Director Of Public Works  
County of Siskiyou  
305 Butte Street  
Yreka, CA 96097

July 02, 2009

Dear Mr. McDermitt:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Ms.Birgitta E. Corsello  
Resource Mgmt - Transportation Director  
County of Solano  
675 Texas Street Suite 5500  
Fairfield, CA 94533-6341

July 02, 2009

Dear Ms.Corsello:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Matt Machado  
Director Of Public Works  
County of Stanislaus  
1010 10th Street, Suite 3500  
Modesto, CA 95354

July 02, 2009

Dear Mr. Machado:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

July 02, 2009

Mr. Albert L Sawyer, PE  
Assistant Director Of Public Works  
County of Sutter  
1130 Civic Center Blvd, Suite D  
Yuba City, CA 95993

Dear Mr. Sawyer, PE:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Gary Antone  
Director Of Public Works  
County of Tehama  
9380 San Benito Avenue  
Gerber, CA 96035-9702

July 02, 2009

Dear Mr. Antone:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Richard Tippet  
Director Of Transportation  
County of Trinity  
P O Box 2490  
Weaverville, CA 96093-2490

July 02, 2009

Dear Mr. Tippet:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Peter Rei  
Director Of Public Works  
County of Tuolumne  
2 South Green Street  
Sonora, CA 95370

July 02, 2009

Dear Mr. Rei:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Michael Lee  
Director Of Public Works  
County of Yuba  
915 8th Street, Suite 125  
Marysville, CA 95901

July 02, 2009

Dear Mr. Lee:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

July 02, 2009

Dear Mr. Reece:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Ms. Martha DeBry  
Director Of Public Works  
Town of Hillsborough  
1600 Floribunda Avenue  
Hillsborough, CA 94010

July 02, 2009

Dear Ms. DeBry:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

Mr. Brian Fragio  
Director Of Public Works  
Town of Loomis  
6140 Horseshoe Bar Rd. Ste K  
Loomis, CA 95650

July 02, 2009

Dear Mr. Fragio:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. In addition, the Department of Transportation (Caltrans) has been directed by the Federal Highway Administration (FHWA) that bridges with unknown foundations are to be treated as scour critical; therefore, these bridges also require POAs. A bridge with an unknown foundation is generally regarded as a bridge that has insufficient information available in order to complete a scour evaluation. A list of your unknown foundation bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your unknown foundation bridges to your District Local Assistance Engineer (DLAE) by September 2, 2010.

If you have as-built foundation details for the listed bridges, please submit them to your DLAE by September 30, 2009. Caltrans will evaluate your bridge for scour at no cost to your local agency.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>) provides FHWA requirements, POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the September 2, 2010 deadline for your POAs, you must submit a work plan to your DLAE by April 29, 2010 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.
